## INTRODUCTION

I am architecturally-inclined, algorithmically-focused and mathematically-learned (and still learning). I enjoy and excel at working on difficult theoretical problems with evasive solutions. Whenever I am confronted with a conceptually-intensive task, I am a dedicated problem-solver.

## SKILLS

Systems architecting, object-thinking, Ruby, Rails, PHP, JavaScript, git, Subversion, Linux administration, Photoshop, HTML, CSS, Java, Rspec and a host of third-party libraries and services.

## EXPERIENCE

### **Freelance Web Developer    Las Vegas, Nevada    2009-2011**

Designed and built several websites and web applications for a variety of clients, both locally and remote. Projects include several content management systems, a personal finance tool, tattoo portfolio websites and a variety of small business websites.

### **Web Developer    Web Marketing Solutions; Las Vegas, Nevada    2009-2010**

Designed and built domain portfolio administration tools for SEO-based company. Helped create automation tools to more easily manage several servers at once.

### **Web Developer    Red Relish; Las Vegas, Nevada    2007-2008**

Designed and built a large-scale inventory management system for new e-commerce website. Extensive front-end design utilizing JavaScript. Set up Linux server with SSL security certificate to house this application.

### **Web Developer    The Ad Boutique; Las Vegas, Nevada    2007-2007**

Helped port an existing in-house Perl application to Rails. Extended application to meet new business requirements, including a front-facing token-based authentication scheme whereby clients were able to view and modify information specific to them.

**Web Developer    Genesis Entertainment; Las Vegas, Nevada    2006-2007**

Designed and built a large-scale ticketing, inventory and scheduling system. Integrated with Authorize.net for payment processing. Set up Linux server and installed an SSL security certificate to house public-facing e-commerce website.

**Web Developer, Property Line; Las Vegas, Nevada    2005-2005**

Designed and built several websites, most of which contained a content management system. Majority of company clients were well-known commercial real estate agencies.

**Web Developer, Merlin Entertainment Properties    2003-2005**

Maintained, updated and extended existing company websites. Designed and built an in-house schedule management system for employees.
